DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 rejected under 35 U.S.C. 102(b) as being anticipated by US 4,989,775 (Shimajiri). Shimajiri teaches applying a flux having a particle volume distribution lying within the area bounded by Curves 1 and 2 of FIG. 10 to the components to be joined, wherein said flux is applied dry and electrostatically charged, and thereafter heating the components to braze them together (col. 2, ll. 30-68); wherein said flux has a particle volume distribution lying within the area bounded by Curves 1 and 2 of FIG. 11 (col. 2, ll. 30-68); wherein said flux is a potassium fluoroaluminate flux (col. 2, ll. 30-68).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
